ABOUT ME

I am an analytical and creative Software Engineer driven by coming to innovative solutions to novel problems. I learn ambitiously and am endlessly curious. I am coachable, adaptable and thrive on direct communication and consistent feedback. On a team I believe a calm and lighthearted approach allows space for efficient collaboration and effective results. I strive to be a leader and give back via mentorship. Software development has been fulfilling as a means to practice each of these characteristics in life.

KEY SKILLS

API Development (RESTful/REST/SOAP)

Object Orient Programming

Container-based Architecture

Application Deployment

Authentication / OAuth2

Third-Party API integration

Database Management & Design

Responsive Design

Testing / Troubleshooting / Debugging

Git / Github

Excellent written and verbal communication skills
